

SYSTEM OF RANKING OF DELIVERY UNITS

A. Basis for the Determination of the Delivery Units

The determination of the delivery units of the LCP offices is based on similarity and interrelatedness of functions.

There are 30 Delivery Units (1-30) and 70 Offices (No. 1-70) identified. (attachment "A")

B. Listing of the Delivery Units from the Highest to the Lowest.

The average rating of each delivery unit is computed, then listed down from No. 1 (highest) to No. 30 (lowest) by the Planning Committee.

Example:

Delivery Unit	Rating	Rank
1. NTRD	4.930	1
2. Executive Offices	4.909	2
3. Pathology Department	4.869	3
↓		
30. Cash Division	4.255	30

C. Finalization of the Ranking List and Its Approval

The ranking list is finalized by the Planning Committee and submitted to the Chairman of the Performance Management Team (PMT) for deliberation and concurrence. The Finalized ranking list is forwarded to the Executive Director for Approval. The approved ranking list becomes now the final Ranking of the LCP Delivery Units for Submission to the Department of Budget and Management (DBM).
